SOUTH FLORIDA WATER MANAGEMENT DISTRICT

July 27, 2011

DONALD SCHROTENBOER
ALICO, INC
PO BOX 338
LABELLE, FL 33935

Dear Schrotenboer :

Subject : Partial Acceptance of Construction Completion Certification
ALICO HILL GRADE
Permit No. 26-00453-S, Application No. 910208-6
Hendry County, S11-14,23-25/T45S/R32E

This letter is to acknowledge receipt of your consulting engineer's PARTIAL construction completion certification pertaining to the subject parcel's surface water management system. The submitted information has been accepted and incorporated into the permit file. The engineer's PARTIAL certification corresponds to a portion of the surface water management system permitted under the above listed application number.

District staff is accepting the engineer's certification for farms B and H. District staff considers these features to be constructed in substantial conformance with the plans and specifications approved by the District, with exceptions as noted in the certification documents attached. This satisfies your permit's conditions regarding submittal of an engineer's certification for construction completion of the permitted drainage facilities for farms B and H. Therefore, we thereby convert farms B and H from the construction to the operation phase.

District staff is also accepting the engineer's certification for the levees and control structures for farms A, C, D and E. Pending are the installation of the corresponding emergency discharge structures. In addition, our office is also accepting the engineer's certification for the control structures for farms F, G, I, J and K. Pending are the construction of the levees for farms F, G, I, J and K, as well as the installation of the corresponding emergency discharge structures. However, farms A, C, D, E, F, G, I, J and K cannot be converted from the construction phase to the operation phase until an engineer's certification of construction completion for the remaining portion of the SWM system to serve the entire project is received and accepted by this office.

The District now has the capability of receiving monitoring reports, construction certifications, conservation easements, conversion/transfer documents, etc. electronically via the District's ePermitting website at http://my.sfwmd.gov/ePermitting.

Should you have any questions, please contact the undersigned at the West Palm Beach Service Center at (561) 682-2204.
